My Presentation

With a good subtitle :-)

Use Markdown to write your slides. Don't be afraid, it's really easy!

Use Markdown to write your slides. Don't be afraid, it's really easy!

Making points

Look how you can make *some* points:

Use Markdown to write your slides. Don't be afraid, it's really easy!

Making points

Look how you can make *some* points:

Create slides with your favorite text editor

Use Markdown to write your slides. Don't be afraid, it's really easy!

Making points

Look how you can make *some* points:

- Create slides with your favorite text editor
- Focus on your content, not the tool

Use Markdown to write your slides. Don't be afraid, it's really easy!

Making points

Look how you can make *some* points:

- Create slides with your favorite text editor
- Focus on your content, not the tool
- You can finally be productive!

There's more Syntax highlighting

You can also add code to your slides:

<div class="impact">Some HTML code</div>

CSS classes

You can use shortcut syntax to apply Some style!

...or just HTML if you prefer.

And more...

12-column grid layout

Use to the included grid layout classes to split content easily:

Left column

- I'm on the left
- It's neat!

Right column

- I'm on the right
- I love it!

Learn the tricks

See the wiki to learn more of what you can do with Remark.js
